# PROTEC TIN

A quick & easy way to protect paint tins in transit

## Unique Design

Each paint fitment has multiple crash pads that grip & encase the tin to create a solid, shipping-proof structure.

## Manufactured in the UK

Short lead times & low minimum order quantities.

## Space Saving

Fitments of the same size nest together for condensed storage.

## Universal Fitment

The same fitment is used to secure the top and bottom of the tin at its most vulnerable points, reducing componentry within your business.

## Made from Recycled Kraft Paper

Provides a strong, durable packaging material.

## Customisable

Plain or branded outer boxes available.

## Eco-Friendly

Recyclable, biodegradable & compostable.

## About PROTECTIN

PROTECTIN has been engineered by experts to protect paint tins from damage during transit.

Available in multiple pack sizes, simply apply your chosen PROTECTIN fitment to the top & base of your paint tin prior to inserting into a shipping outer.

## Single Pack Sizes

- 500ml
- 750ml
- 1 Litre
- 2.5 Litre
- 5 Litre
- 10 Litre (NEW)

## Multiple Pack Sizes

- 6 x 750ml

## Safety Assured

Our paint tin packs are UN1263 drop-test approved to deliver your product safely.

A quick & easy way to protect paint tins in transit

## Manufactured in the UK

As Europe's only combined manufacturer of Moulded Pulp & Corrugate Packaging, Cullen has been producing effective packaging solutions for the industrial sector for 100 years.

All manufacturing takes place at our 610,000 sq.ft. site near Glasgow, where our team of experts prioritise product functionality in line with sustainability to deliver products that are fit for purpose whilst being recyclable and biodegradable.

## Trusted by our customers

Thanks to our robust product engineering and manufacturing capabilities, our PROTECTIN paint tin transit packaging is now used by many paint e-tailers across the UK & Europe.

Its reliability has enabled our customers to ship paint tins with confidence, whilst benefiting from a significant reduction in costly courier spillage fines.
